
The sleep that
makes your day.
SUPREME COLLECTION
JENSEN®

4-5 The sleep that makes your day.

We believe you should never be held back because you're tired. Every Jensen bed is made with the purpose of helping you wake up fully rested.

6-9 Sleep pioneers since 1947.

Our story begins in 1947 with the wave of optimism following the end of WWII. We still produce our beds in Svelvik, where it all started.

10-13 Your sleep health.

We don't just build beds – we focus on every aspect of sleep health to help you live a life where you have the energy to do everything you want.

14-17 Friendly to nature. And you.

We work with independent labels to ensure the sustainability of our beds and accessories. For example, the Nordic Swan Ecolabel

18-23 It's not just a bed. It's a Jensen.

Find out more about the many innovations that contribute to the superior sleep comfort of the Jensen Supreme Collection.

24-27 Choose the right bed.

Size, model, mattress tension. There are many things to consider when buying a new bed and this article will help you on your way.

- Jensen First
- Mattress toppers

54-62 Customized by you.

We offer a complete selection of accessories and fabrics with design concepts that match our beds.

We design and build beds that make
the most of your sleep, so you can
make the most of your day.

14 February 1947

The company is founded as Jensen & Birkeland, producing chairs and sofas.

Sleep pioneers since 1947.

Along the coast of southeastern Norway, just outside Oslo and right by the powerful Drammen Fjord is where you'll find Svelvik. Instantly noticeable about this idyllic town are the winding streets and the white houses. But what happens when you scratch the beautiful surface? You'll find hard work, craftsmanship passed through generations and the sleep of your dreams.

It was here in Svelvik, only two years after the Second World War ended, that the Jensen family started their furniture production. Materials were limited in 1947, ambition was not. From the production of the first mattresses, the aim was to give everyone who chose Jensen the best possible sleep. This hasn't changed.

We believe you should never be held back because you are tired – that's why we have worked tirelessly to learn everything we can about sleep, physiology and materials. Thanks to the knowledge acquired through generations, we have earned the trust of customers far from our home in Norway.

Still, we never forget where we come from. Our factory remains here in Svelvik and we are proud to say that every bed and mattress carrying our name is made with passion and craftsmanship. Because to us, sleep is not something that's just for the night. It's what makes your day.

1952

The first spring mattress, Svella, is launched.

1955

The sofa-bed Siesta is launched.

1984

The newly constructed factory at Sand, just outside Svelvik, begins production.

1985

Jensen starts exporting beds to Denmark.

1990

To further enhance the sleep comfort of Jensen beds, a close collaboration with a physiotherapist begins.

1992

The first adjustable bed on the market – Jensen Vital – is launched.

1998

A revolution in sleep comfort – the Jensen® Original Zone System – is launched.

2004

The world's most advanced bed, the Jensen Supreme Dynamique, is launched. Jensen is bought by Hilding Anders International AB.

2006

The first Jensen beds carrying the Nordic Swan Ecolabel are introduced.

2009

The innovative TempSmart mattress topper and pillow are released. The technology automatically stores or releases body heat as needed, creating a perfect environment for sleep comfort.

2010

The Jensen Aloy® Spring System is introduced, further enhancing the sleep comfort of Jensen's beds.

2014

Jensen Exact Comfort Adjustment is launched, giving the option to easily adjust mattress tension according to the body's needs.

2020

Our most advanced spring system, Aloy® 3.0 is launched. The innovation represents our ambition to help our customers wake up fully rested – every day.

2026

Approaching our 80th anniversary, Jensen is not only a well-known brand in many European countries, but is also rapidly gaining ground in Asia.

Your sleep health is our job.

Good sleep is one of the keys to a healthy life. But is it something you prioritize? A quality bed that is adapted to the specific needs of your body is great start. The next step is to give yourself the best possible opportunities for improved sleep through healthy routines – and we are happy to guide you.

Great sleep starts while you're awake.

Life is not always easy. On the contrary, it often gives you a sense of being short on time. This makes it even more important to sleep well – which is a challenge all on its own. There are several routines you can practice to make it easier to fall asleep, to improve your sleep quality, to find your focus in the morning and to perform at your peak during the day. We have divided them into four phases, each with its own purpose.

WAKE-UP

Find your focus for the day ahead. Exposure to natural morning light, energising yourself through exercise or drinking an invigorating tea are all good practices in this phase.

AWAKE

Maintain your energy levels and perform at your best. Your sleep is of course essential for staying focused throughout the day, but exercise, regular meals and good hydration also impact your physical and mental performance.

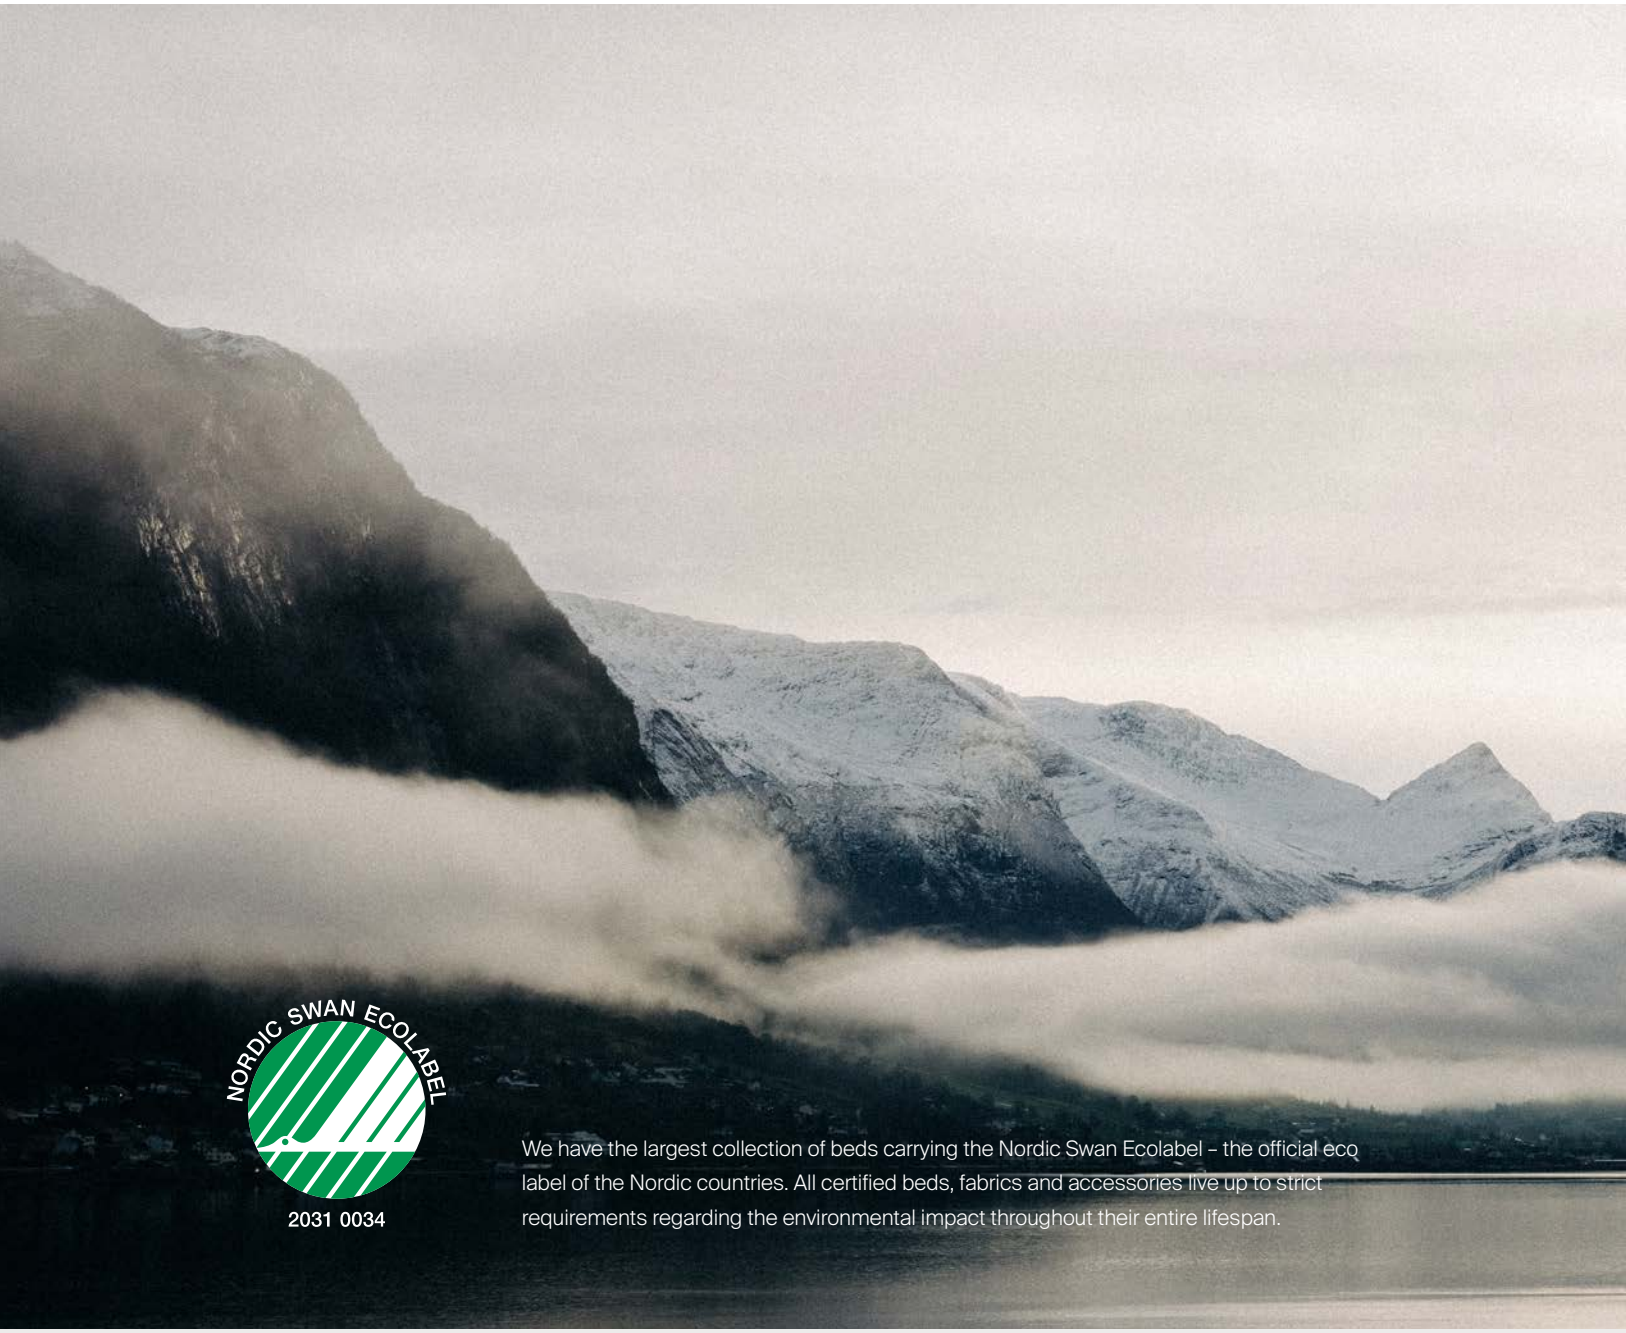
WIND DOWN

Unwind and prepare your body for the night's sleep. Apart from avoiding alcohol, caffeine and nicotine, you can also help yourself to better recovery by avoiding digital screens before going to bed.

ASLEEP

Sleep with quality and wake up refreshed. By setting regular times for your sleep and having the right conditions in your bedroom, such as the proper darkness and temperature, you give yourself the best conditions for recovery during the night.

Ready for a new routine?
Scan the QR-code to explore our library of routines for each phase of the day. Try to include some of these into your everyday life and experience a new sense of well-being.



2031 0034

We have the largest collection of beds carrying the Nordic Swan Ecolabel – the official eco label of the Nordic countries. All certified beds, fabrics and accessories live up to strict requirements regarding the environmental impact throughout their entire lifespan.

We share the dream of a sustainable society.

FSC
www.fsc.org
FSC® C154287

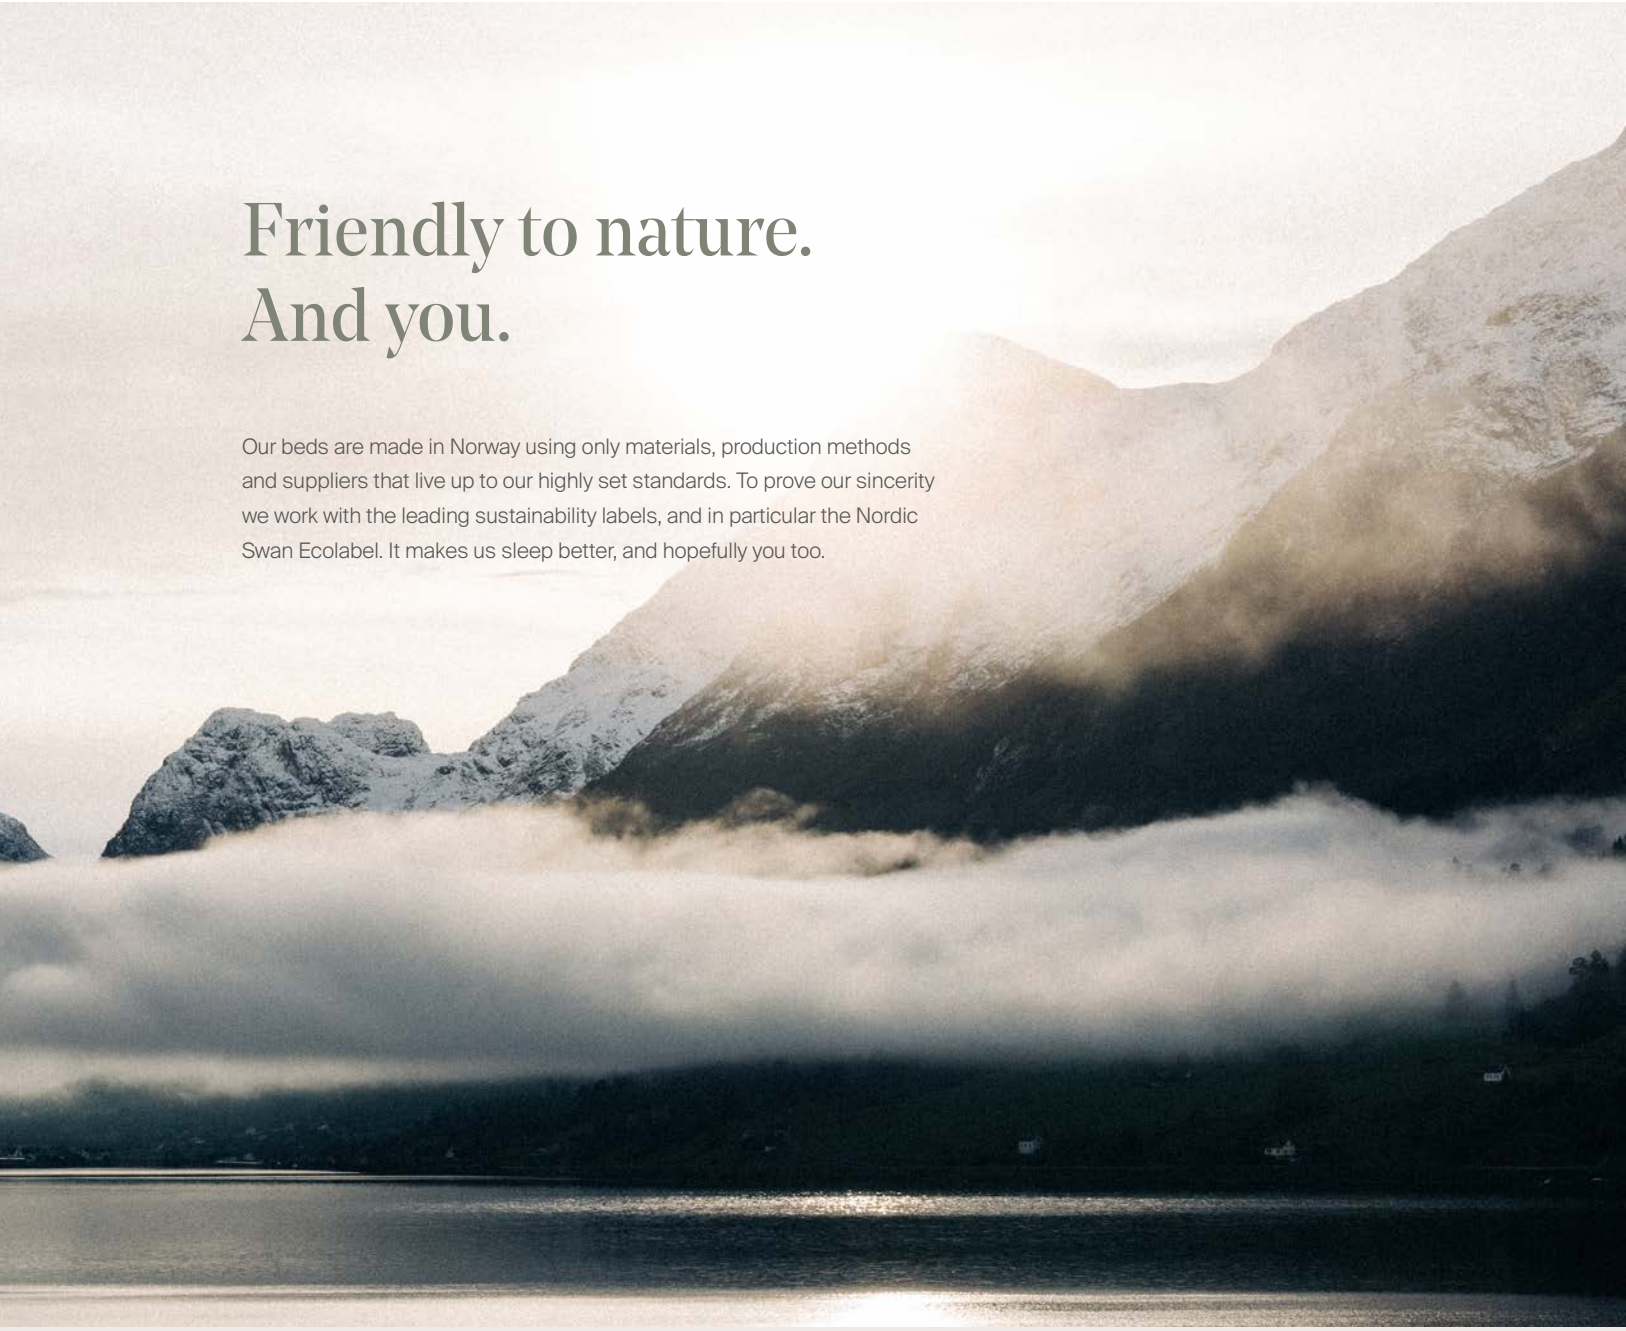
The wood we use in our bed frames is certified by the Forest Stewardship Council (FSC®). This ensures that the wood is sourced and processed in a sustainable, responsible and socially beneficial manner.

Grønt Punkt Norge

Grønt Punkt Norge is a non-profit organisation aiming for circular use of plastic. We are committed to limiting plastic waste and in 2020 alone we reduced plastic use in our production by 16 tonnes.

Friendly to nature. And you.

Our beds are made in Norway using only materials, production methods and suppliers that live up to our highly set standards. To prove our sincerity we work with the leading sustainability labels, and in particular the Nordic Swan Ecolabel. It makes us sleep better, and hopefully you too.



The official Made in Norway label is proof that our beds are authentically Norwegian. To qualify for the label, at least 60% of production and raw material costs must be generated in Norway, as well as a significant share of the production process.

We constantly strive to minimize waste generated by our production. We have return agreements with Norsk Gjenvinning for recycling. By investing in equipment and software we have already reduced waste and production loss by 18%.

We work for a responsible consumption and production in line with UN:s sustainability goals. We prevent users and workers from being exposed to harmful chemicals – and help reduce the contamination of air, water and soil.

- Eco-friendly fabrics.
- Certified and sustainable wood.
- No harmful chemicals.
- Independent quality tests.
- 5 year full guarantee.
- 25 year guarantee against frame- or spring breakage.

No harmful chemicals.
As the owner of a Jensen bed, you have the right to expect a quality sleeping experience that is equally safe for your health and for the environment. Hazardous chemicals have no place in a Jensen bed or any of our accessories, which is why we don't treat any surfaces made of wood, metal or fabric with unhealthy flame retardants or other harmful chemicals.

The planet is not renewable, so we have to be.

The planet demands us to be smarter when it comes to the use of resources. Beds are no exception. Working with circular design, we extend the life cycle of our beds and accessories, without compromising their quality. Our aim is always to make beds that stand the test of time, while constantly working to reduce their foot print. Our products are manufactured in Norway with a five-year full guarantee and a 25-year guarantee against frame or spring breakage on all beds.

Today, more parts than ever before in our beds can also be replaced when they are worn out, giving the choice to repair rather than to buy a completely new bed. In our production, we also re-use materials to a higher degree than ever. For example, 30 percent of the steel in our springs has been recycled.

Eco-friendly fabrics.

We strive to only use recyclable and re-usable fabrics in our beds. The fabrics carrying the Green Care and Easy Care labels are produced with 75 percent less CO_2-emissions compared to virgin polyester and are easily cleaned with water and mild soap. All of our fabrics also live up to the demanding requirements set by the Nordic Swan Ecolabel.

Our most luxurious bed fabrics are made of wool produced in Norway. This elegant and soft material is inherently sustainable and naturally flame retardant. Its elasticity gives it a flexibility that feels softer to your skin and ages beautifully. The natural, temperature regulating effect of wool will also do wonders for your sleep quality.

The aim of every innovation is *always to improve sleep comfort*, because this is the key to increasing the quality of your sleep and waking up fully rested – every morning.

It's not just a bed. It's a Jensen.

To give you the best sleep quality possible, our development team has expertise in physiology and sleep science. Our innovations focus on improving sleep comfort to limit the need to wake up and change your position. Because the less disruption you experience while you sleep, the better.

The link between sleep comfort and sleep quality.
There are many reasons why we might wake up during sleep. Dreams, snoring or a sudden need to go to the bathroom are all examples of this. But there are also instances where your bed or the conditions in which you sleep are the problem. Your bedroom might be too warm or cold, and the bed itself might not give the comfort you need to continue sleeping.

If your bed is too firm your brain will signal a need to get out of deep sleep in order to move your body and relieve the discomfort. One example is positional paresthesia, where your arm falls asleep because you're putting pressure on it. In short, if your bed doesn't provide the necessary sleep comfort, you will not get enough time in the various stages of sleep. The result is that you feel tired in the morning.

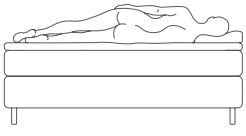
At Jensen, the aim of every innovation is always to improve sleep comfort, because this is the key to increasing the quality of your sleep and waking up fully rested – every morning.

We support your body.

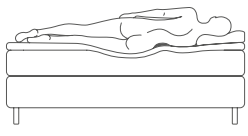
We develop beds with passion, craftsmanship – and science. Understanding sleep and how the body recovers is essential to building better beds.

The Jensen® Original Zone System is developed exclusively to help improve your sleep quality. It combines a soft shoulder zone with firmer support for the curve of the back. This enables the shoulders and hips to sink slightly deeper into the bed, providing optimal pressure relief. The effect is the same whether you sleep on your side or on your back. This system is an integral part of every Jensen bed and contributes greatly to undisturbed sleep.

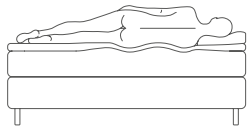
THE CORRECT SLEEPING POSITION:



Too firm.
Hips and shoulders do not sink into the mattress and the waist and lower back are not properly supported.



Too soft.
The body sinks too deep into the mattress and the spine is unnaturally curved.



Perfect balance.
The mattress provides an even, comfortable support. The hips and shoulders sink into the mattress making the spine straight.

Jensen Aloy® 3.0 Spring System.

A determining factor in mattress comfort is the spring system. Jensen Aloy® 3.0 is our best and most flexible spring system, continuously adapting to your sleeping position and weight distribution. The extra soft shoulder zone gives plenty of space for your shoulders, while the hip zone provides both better load-bearing capacity and room for the hip to sink even further down into the mattress. Patented and exclusive to Jensen, Aloy® 3.0 gives your body the support it needs for you to wake up fully rested.

1. Provides softness and comfort, letting the body sink into the mattress.
2. Adjusts to your body and gives stability.
3. Provides an extra level of support.

Springs two and three work together to relieve the pressure on the muscles resulting in improved blood circulation. Contributing to a deeper and more undisturbed sleep.

Scan the code or visit **jensen-beds.com** to learn more and watch the film about Jensen Aloy® 3.0.

Adjust the firmness of your bed using your smartphone.

Jensen Exact Comfort Adjustment.

Recurring back pain, pregnancy or yesterday's workout are just a few reasons why you may need to temporarily change the firmness of your mattress. Jensen Exact Comfort Adjustment lets you adapt the firmness of your bed with continuous precision. With just the push of a button, you can sleep exactly as your body needs – every night.

Remote control included. App support is also available.

Jensen Exact Comfort Adjustment is available as an add on for our Nordic and continental beds.

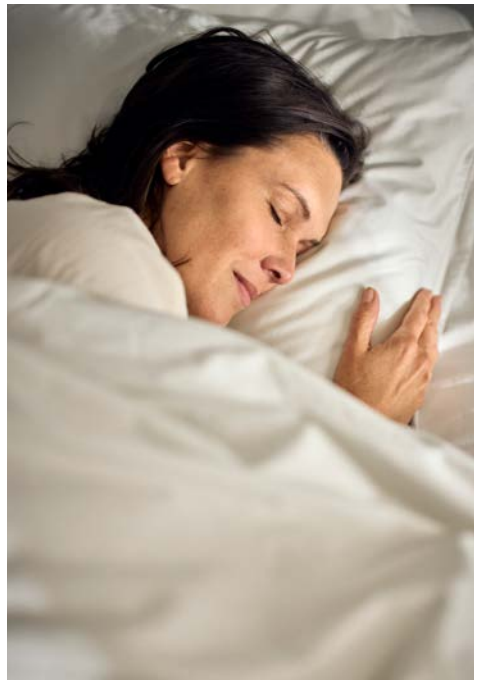
Choose the right bed.

Our development team has expert knowledge in physiology and sleep science to increase the comfort of our beds – and the quality of your sleep.

The bed is an investment you'll spend every night with for many years to come. This guide will tell you what things to give extra attention as you browse through the many alternatives on the market.



The first thing to remember when looking for a new bed is how important this piece of furniture is for your quality of life. When you are well rested you can perform at the top of your capacity. And of course we are just as impacted by poor sleep quality. In the short term it leads to difficulties with concentration and mood swings. The long term consequences get increasingly serious with reduced resistance to illness and accelerated aging. With this in mind it's safe to say that a bed is an investment in your own health and performance.

Make the most of your sleep.
People today generally value their bed higher than 15 years ago, and are prepared to invest more money when buying a new one. A qualified guess as to why we see this development is the introduction of the smart phone. As most people bring a small, hand-held entertainment system into the bedroom every night, going to bed no longer means going to sleep. This makes it more important than ever to make the most of the hours that you actually do sleep. And that's where a quality bed makes the difference.

So how do you find the right one? Considering the amount of models and alternatives available it is most certainly out there, no matter what body type and personal preferences you have. Let's go through the procedure of finding the bed of your dreams, step by step.

Reversible, continental or adjustable?
Different types of beds have their unique design and functionality. The most popular model today is by far the continental bed. It consists of three layers, making it higher than reversible mattress beds and providing great sleep comfort. The bottom layer is a box mattress, the middle a spring mattress on which a mattress topper is placed to complete the setup. Jensen continental beds have up to three individual spring systems, giving significantly better support compared to single mattress beds. A distinctive feature of continental double beds is that there is no crack in the middle, making it more comfortable.

The model known as reversible is the base level bed mattress and is easily used in an existing bed frame. Even though it has just two layers, the Jensen® Original Zone System provides good sleep comfort. One step up in quality, Jensen also provides the exclusive Nordic Line. It has a sturdy bed frame and features a dual-sprung pocket spring system with Jensen Pocket on Pocket technology.

Common questions and our answers.

1

My back hurts, should I get a firm mattress?

No, you should get a mattress that's just right for your body type, weight and sleeping position.
The important thing to bear in mind is that the mattress should support your body so that you can sleep with a straight spine.

2

Is it really necessary to try the bed?

Don't fall into the trap of focusing only on looks. Yes, your bed is a piece of furniture but it is first and foremost supposed to help improve your sleep quality. By trying several beds yourself you increase the chance of finding the perfect match.

3

What's so special about a continental bed?

The continental bed consists of three layers. This makes it higher than a traditional reversible mattress. It also makes for great sleep comfort, since up to three individual spring systems can work together to give you optimal support.

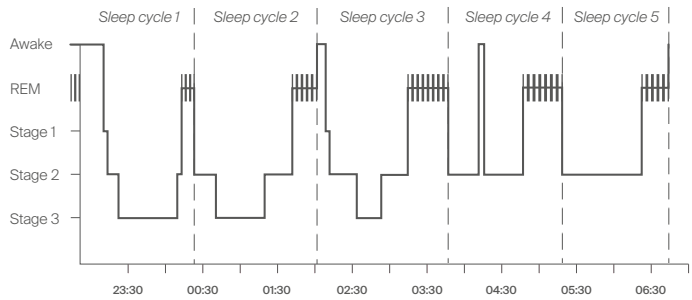
A type of bed that is on the rise in popularity is the adjustable. It provides a level of flexibility and sleep comfort that you just don't get with conventional beds, giving you the possibility of easily fine tuning the mattress' support. An adjustable bed is an especially interesting choice if you suffer from body aches. Even small adjustments in mattress firmness help relieve everything from temporary back pain to improving sleep quality throughout pregnancy. The adjustable bed also opens up for using the bed in new ways, for example watching TV or reading with comfort that is simply on another level.

Choose mattress tension.
When it comes to measurements and what type of design you prefer for your new bed, you can do much of your research at home. But to truly find the right bed you need to visit a reseller and try the beds out for yourself. It is the only way to experience the differences between each type of bed, and most importantly it is a must to order the right firmness. The mattress must comfortably support your entire body so you can relax and sleep well throughout the night. A key to achieving this is the mattress' firmness. It's particularly important that your shoulders and hips sink into the mattress and that your spine is straight. If your body relaxes, you will not wake up stiff and sore in the morning. The right firmness also reduces the risk of unnecessary strain, back problems and restless sleep.

"You'll know you've found the perfect bed when you can sleep through the night peacefully without tossing and turning. Not moving is the key to better sleep quality."

All Jensen resellers are educated to help you find the right mattress

The stages of sleep.



Do you want to learn more about the different stages of sleep and their importance for our recovery? Scan the code or visit **jensen-beds.com.**

tension. They will help you try out the bed in a correct way, lying down in the same position you do when you go to sleep at home. Even though it may seem awkward, try to lie still for at least five minutes in the bed to experience the bed's qualities and make sure you are comfortable. Also try several beds so you can compare them to each other.

However carefully you choose your mattress firmness, there will be instances when your body would benefit from a temporary change. This problem is easily solved with the Jensen Exact Comfort Adjustment add-on. It's available for Jensen's continental and Nordic beds and lets you adjust the firmness of your mattress exactly as your body needs. You can find out more at page 23.

What size do you need?
The size of your bedroom can sometimes be a limiting factor, but given that you have space you should aim for a bed measuring at least 90x200 centimeters if you sleep alone and 180x200 centimeters if you share your bed with a partner. If you have pets or children that like to snuggle up beside you, you should also take this into consideration when deciding the size of your bed. So what about length? If you are tall, then you should add extra length to provide the necessary sleep comfort. A rule of thumb is that the length of your bed should at least equal your own height plus 20 centimeters. At Jensen, we give you the possibility of ordering your bed with custom measurements to achieve the best sleep comfort possible.

Don't forget your head.
The pillow is too important to neglect when making an investment in sleep quality. Everyone loves a comfortable pillow, but the most important thing to look out for is how it helps the back of your neck stay in line with your spine. The width of your shoulders is one factor that will affect what size of pillow is right for you. The position in which you sleep is another.

Sleep well!
At this point we hope you have a good idea about what to look out for when deciding which bed is the perfect match for you. Good luck, and don't forget that there's always expert advice waiting at your nearest Jensen reseller.

It will help you find the beds best suited to your needs.

Reversible mattresses

The first level of Jensen sleep quality is the reversible mattress. It is easily used in your existing bed frame and provides great sleep comfort even with just one bottom layer and a top mattress.

Nordic

The Nordic design concept features a large assortment of accessories while the bed itself has a single-piece surface. This means that even with a double bed you are rid of the hard middle edge of conventional beds.

The Supreme Collection.

We are proud to present the latest result of our long tradition in bed making. From the design to the materials and production methods used, the Supreme Collection is a statement of quality and sustainability. All bed types are available as single or double bed sets.

Continental

Our continental beds feature three layers of mattresses, giving a significant boost in sleep comfort and quality. Available as dual tension, our double beds can be ordered with individual firmness for each side of the bed.

Jensen Exact Comfort Adjustment is available as an add-on, fine tuning the matress' tension to your body's needs. See page 23.

Adjustable

Our adjustable beds provide next level flexibility and sleep comfort. Here you have the possibility of both changing the bed's support and adjusting the bed to your preferred position when reading or watching TV.

Most of our beds can be ordered with adjustable functionality. For more information, see the next page.

Our adjustable beds.

Most of our beds can be ordered with adjustable functionality through either the introductory Jensen Dream, the elegant Lean or the more luxurious Jensen Aqtive II. If you experience recurring body aches this type of bed is an especially interesting choice, but anyone can benefit from its functionality. As we go through life we all experience change to our bodies, making it a great advantage to be able to change the way your bed gives support to your current needs. With just the push of a button you can raise or lower the bed from both ends to adjust the bed to your liking.

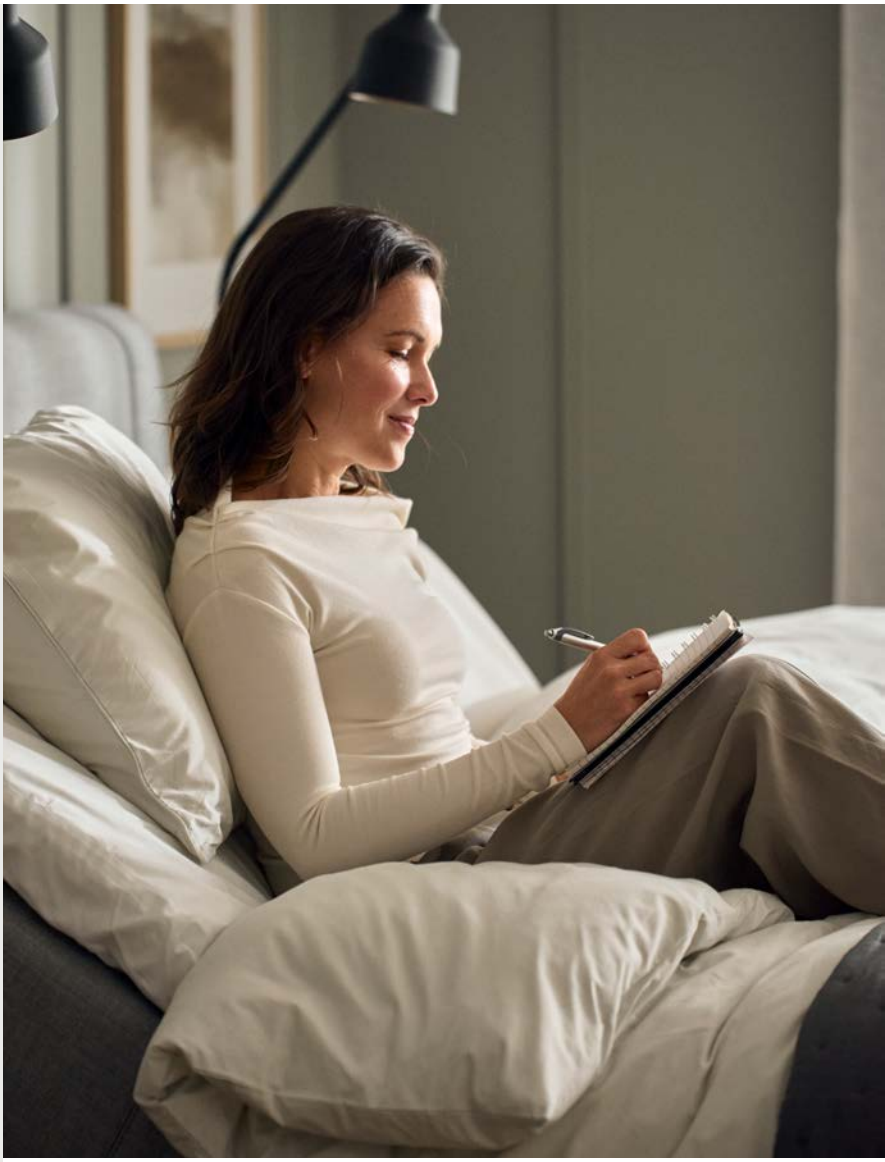
The adjustable bed also opens up for using the bed in new ways, for example watching TV or reading with comfort that is simply on another level.

FUNCTIONS:

- The headrest function adapts the bed so that your neck and head are always in the right position when sitting upright.
- Stepless adjustment up/down for both head and foot end, individually or together.
- Two beds can be connected and controlled in sync by one remote.
- Download our app to easily find and save your favorite position. Supports voice control.
- Adjust the bed position using voice control.

Active II also has:

- A practical light under the bed that can be turned on without disturbing your partner.
- Memory function for saving your favorite position.



Jensen Dream

This is the introductory model in our adjustable bed program. The Jensen Dream has all the functions you need to easily adjust your bed to your body's current needs as well as activities such as reading or even having breakfast in bed. It can either be placed on a bed base or have legs attached. The mattress on the base is a Jensen reversible mattress.

Jensen Dream is available together with the beds Diplomat and First.

An adjustable bed can give you the freedom to do things other than sleep, such as read a book or watch TV.

Jensen Lean

Jensen Lean represents the latest in bed design and adjustable technology. The low base gives an elegant impression while our new Ease-concept provides unique qualities in durability, easy care and sleep comfort that adapts to your body. All in all, Jensen Lean does wonders for your bedroom, and for your sleep.

Jensen Lean is available with Prestige, Ambassadør and Diplomat.

Jensen Aqtive II

The technology inside this elegant bed is concealed by the fabric-covered frame, giving it the look of a continental divan set when inactive. The Jensen Aqtive II is dual-sprung with spring systems in both the reversible mattress and the base. The extra spring system compared to the Jensen Dream, gives the bed even better stability and comfort.

Jensen Aqtive II is available together with the beds Supreme, Prestige, Ambassadør and Diplomat.

Jensen Supreme Icon

The Jensen Supreme Icon is the very best of Jensen craftsmanship and innovation. Made to stand out, it combines a unique design language with carefully chosen materials and advanced technology to deliver a new level of sleep comfort.

The build quality reflects our long heritage in crafting premium beds. The base gives superior stability all the way to the edges to meet even the highest comfort requirements. The height of this bed is also a manifestation of its quality, giving room for double layers of springs in the base. Together with the Jensen® Original Zone System it provides the perfect balance between support and softness.

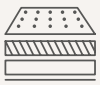
AD at 100

The Jensen Supreme Icon is a statement of design and quality. The exclusive and patented Jensen Aloy® 3.0 spring system, together with an extra layer of pocket springs and the Jensen® Original Zone System create a unique level of comfort. The top layer in this complex sleep system is the Jensen Prisme Mattress Topper. Fitted with an Innergetic® Sonocore Latex core, it provides a soft and healthy sleep environment with exceptional pressure relief and support.

The inclusion of Jensen Exact Comfort Adjustment in the base allows you to adjust the mattress firmness from night to night. This ensures great sleep quality throughout the long lifespan of the bed, as it will adapt to your body's changes over time. With the push of a button, you can fine-tune the mattress tension to perfection, based on what your body needs at any given moment. Seemingly small adjustments that let you wake up fully rested.

Jensen Supreme Icon is Scandinavian design through and through. It is available in a wide range of colours and has a large selection of specially designed accessories. The fabrics are made from 92% wool, creating an elegant, soft textile that is inherently sustainable and naturally flame retardant.

Jensen Supreme Icon features a continuous sleeping surface and is available in all standard sizes, with special sizes made to order.



Our continental beds and Nordic Seamless beds have whole sleeping surfaces, without hard edges in the middle. However, the technology still allows one to choose the degree of firmness individually.

Jensen Supreme

The luxurious Jensen Supreme is a tribute to our heritage. Shaped by the innovative spirit and craftsmanship that have defined our beds since 1947, it feels as premium as it looks. The advanced technology delivers uncompromising comfort, while the award-winning Nordic design balances simplicity and elegance. To complete the experience, carefully chosen materials and fabrics create an enveloping sleep that helps you wake up fully rested, year after year.

Underneath its beautiful textile surface, the Jensen Supreme is equipped with the Jensen Aloy® 3.0 spring system, providing precise support adapted to your body for excellent sleep quality.

The Jensen Supreme gives you the benefit of our most advanced technology. The exclusive and patented spring system Jensen Aloy® 3.0, together with an extra layer of pocket springs, the Jensen® Original Zone System and stretch fabrics in all sleeping surfaces. Together they represent the very best in sleep comfort and limit the need to wake and change your sleeping position during the night.

To complete the experience of sleeping in the Jensen Supreme, you have the possibility of adding Jensen Exact Comfort adjustment. This function lets you fine tune mattress tension according to your needs with just the push of a button. You can also choose to go fully adjustable by adding the Jensen Aqtive II motorised frame. This lets you raise or lower your Jensen Supreme from both ends to adapt sleep comfort or transforming it into a favorite spot for reading or watching TV.

Jensen Supreme is available in all standard sizes, with special sizes made to order. It features a continuous sleeping surface on all continental beds and Nordic Seamless.

Jensen Prestige

The Jensen Prestige is made with special care for the environment. The exclusive furniture textiles from Beaulieu are both recycled and recyclable. The bed's sustainable qualities are further emphasized by the modern simplicity of the design.

On the inside, Jensen Prestige offers great sleep comfort with the Jensen Aloy® 2.1 Spring System, Jensen® Original Zone System and double spring support. The quality of the materials and the innovative technology makes sleeping in this bed an experience out of the ordinary, providing support that adapts to your body.

The sleep comfort of the Jensen Prestige is centered around the Jensen® Original Zone System with Jensen Aloy® 2.1 Pocket Spring System (14 cm). This provides an extra soft and long shoulder zone that gives great flexibility and space for your shoulders. Jensen Aloy® 2.1 also has built-in support for the lower back region. The sleep comfort can be further enhanced by adding Jensen Exact Comfort Adjustment or full adjustable functionality through the elegant Jensen Lean or Aqtive II motorised frame.

Jensen Prestige has an exclusive look that can be paired with several specially designed accessories. Order your bed together with the fabrics, legs, headboard and bed-side table of your choice to make your bedroom complete.

Available in all standard sizes and can also be ordered to measure. Features whole sleeping surface on all continental beds and Nordic Seamless.

Jensen Ambassadør

Our classic bed Ambassadør has been updated and now features several new textiles and a wide selection of accessories. This makes it a great choice for anyone who wants a high level of flexibility to personalize their bed. The Jensen Sleep II mattress topper provides additional sleep comfort to a configuration that is already great value for money. As always, we only choose the best materials for our beds. The quality of the foam used in the mattress' gives both premium comfort and breathability, transporting away moisture and excess warmth to help you sleep peacefully throughout the night.

Jensen Ambassadør +

This bed takes everything that made the original Ambassadør so popular and adds an extra level of exclusivity. The Jensen Sleep III mattress topper and Innergetic® Sonocore latex-filling makes sleeping in the Ambassadør + a dream. Aside from adding optimal air and moisture transportation to help regulate body temperature throughout the night, the latex is also naturally resistant to dust mites and bacteria.

The Ambassadør + is available in no less than 4 different firmness levels. And with the added option of including Exact Sleep Comfort Adjustment in the set-up, it can also provide adjustable support to help relieve aching backs or other temporary pains.

The Jensen Aloy® 2.1 Spring System (12,5 cm) of the Jensen Ambassadør supports and adapts to your body. The extra soft and long shoulder zone provides great flexibility and space for your shoulders. The spring system also features built-in support for the lower back. The bed can be ordered as a reversible, Nordic, continental or as an adjustable combined with the elegant Lean or with the luxurious Aqtive II motorised frame.

Available in all standard sizes and can also be ordered to measure.

Ambassadør+, technical facts:

1. Jensen Sleep III
2. Jensen Aloy® 2.1 Pocket 12,5 cm with Jensen® Original Zone System
3. Innergetic® Sonocore Latex
4. Jensen Support Pocket 12,5 cm
5. Optional: Jensen Exact Comfort Adjustment

Jensen Diplomat

The Jensen Diplomat is equipped with Jensen® Original Zone System. It also features Jensen Aloy® 1.0 Spring system with built-in lower back support. The spring system in the base gives a pleasant sleep comfort. The bed is made with the same high demands on quality as every Jensen bed. This is evident when examining the details closely, such as the seams and exquisite double stitching.

The Jensen Diplomat can be ordered as a reversible, Nordic, continental or as an adjustable combined with the elegant Lean or luxurious Aqtive II motorised frame.

Available in all standard sizes and can also be ordered to measure.
Features whole sleeping surface on all continental beds and Nordic Seamless.

FACTS:

Firmness:

Soft, medium, firm or extra firm sleep comfort or in combination.

Model:

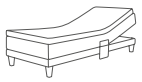
Reversible

Nordic

Nordic Seamless

Continental

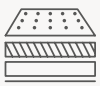
Lean



Aqtive II

Available colours:

Natural 466 Grey beige 467 Anthracite 468



Our continental beds and Nordic Seamless beds have whole sleeping surfaces, without hard edges in the middle. However, the technology still allows one to choose the degree of firmness individually.

Technical facts:

1. Jensen Sleep I
2. Jensen Aloy® 1.0 Pocket (12,5 cm) with Jensen® Original Zone System
3. Cellex XS
4. Jensen Support Pocket 12,5 cm

Jensen First

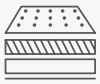
This is the introductory model in the Supreme Collection, representing the baseline for Jensen sleep comfort. Even though it's more stripped down compared to the other models in the collection, it still provides all the essentials for a good night's sleep. Jensen First is equipped with the Jensen® Original Zone System in combination with the innovative Ease concept. It features Sense 2.0 springs to provide comfort and support.

The Jensen First can be ordered as a mattress, Nordic, continental bed or as an adjustable combined with the Dream motorised frame.

Available in all standard sizes and can also be ordered to measure.
Features whole sleeping surface on all continental beds and Nordic Seamless.

Sleep comfort and bed care with Ease.

First is fitted with our innovative Ease-concept. It provides unique qualities in both sleep comfort and bed care. The high-quality springs eliminate the need to flip the mattress while keeping its lifespan intact and ensuring that the bed remains comfortable and supportive for years to come.



Our continental beds and Nordic Seamless beds have whole sleeping surfaces, without hard edges in the middle. However, the technology still allows one to choose the degree of firmness individually.

Mattress toppers.

The right mattress topper helps make a good night's sleep even better. It should feel soft and enveloping – but not clammy. All our bed mattresses are designed for this purpose. An optimized zone with denser quilt at the shoulders and hips increases the elasticity of the fabric, which together with Jensen's patented zone system allows your shoulder and hip to sink into the mattress, providing sleep comfort that helps you wake up completely rested.

All Jensen mattress toppers carry the Swan label.

The mattress topper covers are separable, removable and washable.

Jensen Sleep I / II / III
Jensen Sleep I has Cellex XS filling while Jensen Sleep II delivers increased sleep comfort through Cellex XO. The luxury Jensen Sleep III has Innergetic® **Sonocore** latex filling. Bacteria and dust mite dislike latex, resulting in a cleaner and healthier bed climate. Jensen Sleep mattresses' have one smooth and one grooved side. Most people find the grooved side softer and the smooth side firmer. Jensen's inspiration from nature is shown in the design through a pattern of birch leaves.
Height: 8 cm / 9 cm / 9 cm

Jensen TempSmart™
This mattress topper has a thermo-regulation system that actively balances the temperature changes that can disturb your sleep. This innovative technology consists of millions of microcapsules, adapting constantly to your skin's climate, by absorbing, storing and releasing excess heat as needed. In this way, the microcapsules keep you within your comfort zone, with great sleep quality as a result. Height: 9 cm

Jensen Prisme
Prisme is designed to deliver a soft, cool and hygienic sleep experience with a distinctly premium feel. This new topper features a non-pilling jersey with 25% Tencel which offers a silky touch, excellent moisture regulation and natural antibacterial properties. The Innergetic® Sonocore Latex core contributes to a clean and healthy sleep environment and provides gentle softness combined with exceptional pressure relief and support. Prisme works closely together with Jensen's zone system. The design is inspired by the Nordic nature, visualising the zones with a pattern of diamonds and shimmering snow crystals. Height: 10 cm.

Split topper
This mattress topper is developed especially for adjustable beds. It covers the entire surface avoiding the gap between sleeping partners. The top part of the topper is split, allowing you to raise or lower the head end of your bed without disturbing your partner. The foot end is just like a regular mattress topper. Split Topper is available for Sleep I/II/III, TempSmart™ and Prisme. Height: 8-10 cm

Details are
important to us.
It's that little
extra that does so
much to create
the best overall
impression.

Customized by you.

We know how to build beds for optimal sleep quality. We also know how important it is for your bed, and your bedroom, to truly feel yours. That's why we offer a wide range of options when it comes to textiles and accessories, giving you the freedom to create the style you want.

Our legs, headboards, bedside tables and ottomans are designed to complement our beds and matched in colour and texture for a cohesive look. Everything to make your bedroom feel as premium as the sleep experience itself.

The pillow completes the experience.

When it comes to sleep comfort, your pillow plays an important part. It should fit into the nape of your neck and fill the space between shoulders and head. It should neither be too high nor too low, but allow the neck to stay in line with your spine. A pillow suited to your body and preferred sleeping position will accentuate a good mattress and contribute to better sleep quality.

Jensen TempSmart™ Pillow
This pillow features a thermo regulation-function, adapting constantly to your skin's temperature, by absorbing, storing and releasing excess heat as needed. It keeps you within your comfort zone, with great sleep quality as a result.

Jensen SoftSheet.

Fits Jensen mattress toppers perfectly and is also available for split toppers. Made from 100% cotton satin in a very high quality that gives a soft and silky feeling against the skin. Washable at 60°C. Jensen SoftSheet carries the EU-flower and is Oeko-Tex approved.

Mattress topper and pillow protection.

To keep your sleeping environment nice and clean and to reduce wear, we suggest using our protective covers. They shield the sleeping surface from dirt, dust and moisture. All while giving you first class sleep comfort.

Jensen PillowProtect
Give your pillow a longer life with PillowProtect. The thin, flexible material is specially treated to resist moisture while still allowing air to circulate, helping the pillow stay fresh and well-ventilated.

The protector is easy to put on and off, simple to wipe clean and can be machine washed at 60°C for maximum hygiene. It also helps prevent the build-up of dust mites, extending the lifetime and comfort of your pillow. With its soft feel and stretch fabric, it adapts naturally to the pillow and maintains a high level of sleeping comfort.

SoftProtect mattress topper
Jensen SoftProtect is made from the same soft, breathable fabric as PillowProtect. The Jensen SoftProtect mattress topper protection is designed to fit our mattress toppers and very easy to put on and remove. The surface is wipeable and can also be machine washed if needed.

The thin and flexible quality of the material is soft and comfortable, with stretch in the fabric, which means that the cover shapes itself to the mattress topper and provides both good sleep comfort and protection over the entire mattress surface.

Jensen TempSmart™ Protect
This technology both protects the mattress topper while increasing your sleep quality. This is achieved through the balancing the temperature to avoid the changes in climate that can cause restless sleep. TempSmart™ adapts to the skin's climate by absorbing, storing and releasing excess body heat as needed.

Water repellent BAYGARD® WRS
Jensen PillowProtect and SoftProtect contains BAYGARD® WRS, which is composed of special polymers that ensure a high and durable water repellent effect. BAYGARD® WRS do not contain any harmful substances such as heavy metals or formaldehyde.

Headboards.
