

The sleep that
makes your day.

SIGNATURE COLLECTION

JENSEN®

We design and build beds that make
the most of your sleep, so you can
make the most of your day.

14 February 1947

The company is founded as Jensen & Birkeland,
producing chairs and sofas.

Sleep pioneers since 1947.

Along the coast of southeastern Norway, just outside Oslo and right by the powerful Drammen Fjord is where you'll find Svelvik. Instantly noticeable about this idyllic town are the winding streets and the white houses. But what happens when you scratch the beautiful surface? You'll find hard work, craftsmanship passed through generations and the sleep of your dreams.

It was here in Svelvik, only two years after the Second World War ended, that the Jensen family started their furniture production. Materials were limited in 1947, ambition was not. From the production of the first mattresses, the aim was to give everyone who chose Jensen the best possible sleep. This hasn't changed.

We believe you should never be held back because you are tired – that's why we have worked tirelessly to learn everything we can about sleep, physiology and materials. Thanks to the knowledge acquired through generations, we have earned the trust of customers far from our home in Norway.

Still, we never forget where we come from. Our factory remains here in Svelvik and we are proud to say that every bed and mattress carrying our name is made with passion and craftsmanship. Because to us, sleep is not something that's just for the night. It's what makes your day.

1984

The newly constructed factory at Sand, just outside Svelvik, begins production.

1952

The first spring mattress, Svella, is launched.

1955

The sofa-bed Siesta is launched.

1985

Jensen starts exporting beds to Denmark.

1990

To further enhance the sleep comfort of Jensen beds, a close collaboration with a physiotherapist begins.

1992

The first adjustable bed on the market – Jensen Vital – is launched.

1998

A revolution in sleep comfort – the Jensen® Original Zone System – is launched.

2004

The world's most advanced bed, the Jensen Supreme Dynamique, is launched. Jensen is bought by Hilding Anders International AB.

2006

The first Jensen beds carrying the Nordic Swan Ecolabel are introduced.

2009

The innovative TempSmart mattress topper and pillow are released. The technology automatically stores or releases body heat as needed, creating a perfect environment for sleep comfort.

2010

The Aloy® Spring System is introduced, further enhancing the sleep comfort of Jensen's beds.

2014

Jensen Exact Comfort Adjustment is launched, giving the option to easily adjust mattress tension according to the body's needs.

2020

Our most advanced spring system, Aloy® 3.0 is launched. The innovation represents our ambition to help our customers wake up fully rested – every day.

2022

Celebrating our 75th anniversary, Jensen is now one of the strongest bed brands in Norway, Denmark, Sweden, Finland, Iceland, Austria, Belgium, Croatia, Hungary, Italy, The Netherlands, Poland, Slovakia, Germany, Spain, Switzerland, United Kingdom and South Korea.

We have the largest collection of beds carrying the Nordic Swan Ecolabel – the official eco label of the Nordic countries. All certified beds, fabrics and accessories live up to strict requirements regarding the environmental impact throughout their entire lifespan.

We share the dream of a sustainable society.

The wood we use in our bed frames is certified by the Forest Stewardship Council (FSC®). This ensures that the wood is sourced and processed in a sustainable, responsible and socially beneficial manner.

Møbelfakta is an independent test and quality assessment based on Norwegian and International standards (EN and ISO). Durability, material quality, flammability and safety are among the properties tested.

Friendly to nature. And you.

Our beds are made in Norway using only materials, production methods and suppliers that live up to our highly set standards. To prove our sincerity we work with the leading sustainability labels, and in particular the Nordic Swan Ecolabel. It makes us sleep better, and hopefully you too.

Grønt Punkt Norge

Grønt Punkt Norge is a non-profit organisation aiming for circular use of plastic. We are committed to limiting plastic waste and in 2020 alone we reduced plastic use in our production by 16 tonnes.

We constantly strive to minimize waste generated by our production. We have return agreements with Norsk Gjenvinning for recycling. By investing in equipment and software we have already reduced waste and production loss by 18%.

We work for a responsible consumption and production in line with UN:s sustainability goals. We prevent users and workers from being exposed to harmful chemicals – and help reduce the contamination of air, water and soil.

- Eco-friendly fabrics.

- Certified and sustainable wood.

- No harmful chemicals.

- Independent quality tests.

- 5 year full guarantee.

- 25 year guarantee against frame- or spring breakage.

No harmful chemicals.

As the owner of a Jensen bed, you have the right to expect a quality sleeping experience that is equally safe for your health and for the environment. Hazardous chemicals have no place in a Jensen bed or any of our accessories, which is why we don't treat any surfaces made of wood, metal or fabric with unhealthy flame retardants or other harmful chemicals.

The planet is not renewable, so we have to be.

The planet demands us to be smarter when it comes to the use of resources. Beds are no exception. Working with circular design, we extend the life cycle of our beds and accessories, without compromising their quality. Our aim is always to make beds that stand the test of time, while constantly working to reduce their foot print. Our products are manufactured in Norway with a five-year full guarantee and a 25-year guarantee against frame or spring breakage on all beds.

Today, more parts than ever before in our beds can also be replaced when they are worn out, giving the choice to repair rather than to buy a completely new bed. In our production, we also re-use materials to a higher degree than ever. For example, 30 percent of the steel in our springs has been recycled.

Eco-friendly fabrics.

We strive to only use recyclable and re-usable fabrics in our beds. The fabrics carrying the Green Care and Easy Care labels are produced with 75 percent less CO₂-emissions compared to virgin polyester and are easily cleaned with water and mild soap. All of our fabrics also live up to the demanding requirements set by the Nordic Swan Ecolabel.

Our most luxurious bed fabrics are made of wool produced in Norway. This elegant and soft material is inherently sustainable and naturally flame retardant. Its elasticity gives it a flexibility that feels softer to your skin and ages beautifully. The natural, temperature regulating effect of wool will also do wonders for your sleep quality.

The aim of every innovation is
always to improve sleep comfort,
because this is the key to
increasing the quality of your
sleep and waking up fully
rested – every morning.

It's not just a bed. It's a Jensen.

To give you the best sleep quality possible, our development team has expertise in physiology and sleep science. Our innovations focus on improving sleep comfort to limit the need to wake up and change your position. Because the less disruption you experience while you sleep, the better.

The link between sleep comfort and sleep quality.

There are many reasons why we might wake up during sleep. Dreams, snoring or a sudden need to go to the bathroom are all examples of this. But there are also instances where your bed or the conditions in which you sleep are the problem. Your bedroom might be too warm or cold, and the bed itself might not give the comfort you need to continue sleeping.

If your bed is too firm your brain will signal a need to get out of deep sleep in order to move your body and relieve the

discomfort. One example is positional paresthesia, where your arm falls asleep because you're putting pressure on it. In short, if your bed doesn't provide the necessary sleep comfort, you will not get enough time in the various stages of sleep. The result is that you feel tired in the morning.

At Jensen, the aim of every innovation is always to improve sleep comfort, because this is the key to increasing the quality of your sleep and waking up fully rested – every morning.

SOFTER ZONE
LEG COMFORT

FIRMER ZONE
LOWER BODY SUPPORT

SOFTER ZONE
HIP COMFORT

We support your body.

We develop beds with passion, craftsmanship – and science. Understanding sleep and how the body recovers is essential to building better beds.

The Jensen® Original Zone System is developed exclusively to help improve your sleep quality. It combines a

soft shoulder zone with firmer support for the curve of the back. This enables the shoulders and hips to sink slightly deeper into the bed, providing optimal pressure relief. The effect is the same whether you sleep on your side or on your back. This system is an integral part of every Jensen bed and contributes greatly to undisturbed sleep.

FIRMER ZONE
WAIST SUPPORT

SOFTER ZONE
UPPER BODY COMFORT

THE CORRECT SLEEPING POSITION:

Too firm.
Hips and shoulders do not sink into the mattress and the waist and lower back are not properly supported.

Too soft.
The body sinks too deep into the mattress and the spine is unnaturally curved.

Perfect balance.
The mattress provides an even, comfortable support. The hips and shoulders sink into the mattress making the spine straight.

Aloy® 3.0 Spring System.

A determining factor in mattress comfort is the spring system. Jensen Aloy® 3.0 is our best and most flexible spring system, continuously adapting to your sleeping position and weight distribution. The extra soft shoulder zone gives plenty of space for your shoulders, while the hip zone pro-

vides both better load-bearing capacity and room for the hip to sink even further down into the mattress. Patented and exclusive to Jensen, Aloy® 3.0 gives your body the support it needs for you to wake up fully rested.

1. —
2. —
3. —

1. Provides softness and comfort, letting the body sink into the mattress.
2. Adjusts to your body and gives stability.
3. Provides an extra level of support.

Scan the code or visit jensen-beds.com to learn more and watch the film about Aloy® 3.0.

Springs two and three work together to relieve the pressure on the muscles resulting in improved blood circulation. Contributing to a deeper and more undisturbed sleep.

Adjust the firmness of your bed using your smartphone.

Jensen Exact Comfort Adjustment.

Recurring back pain, pregnancy or yesterday's workout are just a few reasons why you may need to temporarily change the firmness of your mattress. Jensen Exact Comfort Adjustment lets you adapt the firmness of your bed with continuous precision. With just the push of a button, you can sleep exactly as your body needs – every night.

Remote control included. App support is also available.

Jensen Exact Comfort Adjustment is available as an add on for our Nordic and continental beds.

*Choose
the right
bed.*

Our development team has expert knowledge in physiology and sleep science to increase the comfort of our beds – and the quality of your sleep.

The bed is an investment you'll spend every night with for many years to come. This guide will tell you what things to give extra attention as you browse through the many alternatives on the market.

The first thing to remember when looking for a new bed is how important this piece of furniture is for your quality of life. When you are well rested you can perform at the top of your capacity. And of course we are just as impacted by poor sleep quality. In the short term it leads to difficulties with concentration and mood swings. The long term consequences get increasingly serious with reduced resistance to illness and accelerated aging. With this in mind it's safe to say that a bed is an investment in your own health and performance.

Make the most of your sleep.

People today generally value their bed higher than 15 years ago, and are prepared to invest more money when buying a new one. A qualified guess as to why we see this development is the introduction of the smart phone. As most people bring a small, hand-held entertainment system into the

bedroom every night, going to bed no longer means going to sleep. This makes it more important than ever to make the most of the hours that you actually do sleep. And that's where a quality bed makes the difference.

So how do you find the right one? Considering the amount of models and alternatives available it is most certainly out there, no matter what body type and personal preferences you have. Let's go through the procedure of finding the bed of your dreams, step by step.

Reversible, continental or adjustable?

Different types of beds have their unique design and functionality. The most popular model today is by far the continental bed. It consists of three layers, making it higher than reversible mattress beds and providing great sleep comfort. The bottom

layer is a box mattress, the middle a spring mattress on which a mattress topper is placed to complete the setup. Jensen continental beds have up to three individual spring systems, giving significantly better support compared to single mattress beds. A distinctive feature of continental double beds is that there is no crack in the middle, making it more comfortable.

The model known as reversible is the base level bed mattress and is easily used in an existing bed frame. Even though it has just two layers, the Jensen® Original Zone System provides good sleep comfort. One step up in quality, Jensen also provides the exclusive Nordic Line. It has a sturdy bed frame and features a dual-sprung pocket spring system with Jensen Pocket on Pocket technology.

Common questions and our answers.

1

My back hurts, should I get a firm mattress?

No, you should get a mattress that's just right for your body type, weight and sleeping position. The important thing to bear in mind is that the mattress should support your body so that you can sleep with a straight spine.

2

Is it really necessary to try the bed?

Don't fall into the trap of focusing only on looks. Yes, your bed is a piece of furniture but it is first and foremost supposed to help improve your sleep quality. By trying several beds yourself you increase the chance of finding the perfect match.

3

What's so special about a continental bed?

The continental bed consists of three layers. This makes it higher than a traditional reversible mattress. It also makes for great sleep comfort, since up to three individual spring systems can work together to give you optimal support.

A type of bed that is on the rise in popularity is the adjustable. It provides a level of flexibility and sleep comfort that you just don't get with conventional beds, giving you the possibility of easily fine tuning the mattress' support. An adjustable bed is an especially interesting choice if you suffer from body aches. Even small adjustments in mattress firmness help relieve everything from temporary back pain to improving sleep quality throughout pregnancy. The adjustable bed also opens up for using the bed in new ways, for example watching TV or reading with comfort that is simply on another level.

Choose mattress tension.

When it comes to measurements and what type of design you prefer for your new bed, you can do much of your research at home. But to truly find the right bed you need to visit a reseller and try the beds out for yourself. It is the only way to experience the differences between each type

of bed, and most importantly it is a must to order the right firmness. The mattress must comfortably support your entire body so you can relax and sleep well throughout the night. A key to achieving this is the mattress' firmness. It's particularly important that your shoulders and hips sink into the mattress and that your spine is straight. If your body relaxes, you will not wake up stiff and sore in the morning. The right firmness also reduces the risk of unnecessary strain, back problems and restless sleep.

"You'll know you've found the perfect bed when you can sleep through the night peacefully without tossing and turning. Not moving is the key to better sleep quality."

All Jensen resellers are educated to help you find the right mattress

The stages of sleep.

Do you want to learn more about the different stages of sleep and their importance for our recovery? Scan the code or visit jensen-beds.com.

tension. They will help you try out the bed in a correct way, lying down in the same position you do when you go to sleep at home. Even though it may seem awkward, try to lie still for at least five minutes in the bed to experience the bed's qualities and make sure you are comfortable. Also try several beds so you can compare them to each other.

However carefully you choose your mattress firmness, there will be instances when your body would benefit from a temporary change. This problem is easily solved with the Jensen Exact Comfort Adjustment add-on. It's available for Jensen's continental and Nordic beds and lets you adjust the firmness of your mattress exactly as your body needs. You can find out more at page 19.

What size do you need?

The size of your bedroom can sometimes be a limiting factor, but given that you have space you should aim for a bed measuring at least 90x200

centimeters if you sleep alone and 180x200 centimeters if you share your bed with a partner. If you have pets or children that like to snuggle up beside you, you should also take this into consideration when deciding the size of your bed. So what about length? If you are tall, then you should add extra length to provide the necessary sleep comfort. A rule of thumb is that the length of your bed should at least equal your own height plus 20 centimeters. At Jensen, we give you the possibility of ordering your bed with custom measurements to achieve the best sleep comfort possible.

Don't forget your head.

The pillow is too important to neglect when making an investment in sleep

quality. Everyone loves a comfortable pillow, but the most important thing to look out for is how it helps the back of your neck stay in line with your spine. The width of your shoulders is one factor that will affect what size of pillow is right for you. The position in which you sleep is another.

Sleep well!

At this point we hope you have a good idea about what to look out for when deciding which bed is the perfect match for you. Good luck, and don't forget that there's always expert advice waiting at your nearest Jensen reseller.

Scan the code to get directly to the Bed Selector at jensen-beds.com. It will help you find the beds best suited to your needs.

Reversible mattresses

The first level of Jensen sleep quality is the reversible mattress. It is easily used in your existing bed frame and provides great sleep comfort even with just one bottom layer and a top mattress.

Nordic

The Nordic design concept features a large assortment of accessories while the bed itself has a single-piece surface. This means that even with a double bed you are rid of the hard middle edge of conventional beds.

The Signature Collection.

We are proud to present the latest result of our long tradition in bed making. From the design to the materials and production methods used, the Signature Collection is a statement of quality and sustainability. All bed types are available as single or double bed sets.

Continental

Our continental beds feature three layers of mattresses, giving a significant boost in sleep comfort and quality. Available as dual tension, our double beds can be ordered with individual firmness for each side of the bed.

Jensen Exact Comfort Adjustment is available as an add-on, fine tuning the mattress' tension to your body's needs. See page 19.

Adjustable

Our adjustable beds provide next level flexibility and sleep comfort. Here you have the possibility of both changing the bed's support and adjusting the bed to your preferred position when reading or watching TV.

Most of our beds can be ordered with adjustable functionality. For more information, see the next page.

Our adjustable beds.

Most of our beds can be ordered with adjustable functionality through either the introductory Jensen Dream or the more luxurious Jensen Active II. If you experience recurring body aches this type of bed is an especially interesting choice, but anyone can benefit from its functionality. As we go through life we all experience change to our bodies, making it a great advantage to be able to change the way your bed gives support to your current needs. With just the push of a button you can raise or lower the bed from both ends to adjust the bed to your liking.

The adjustable bed also opens up for using the bed in new ways, for example watching TV or reading with comfort that is simply on another level.

FUNCTIONS:

The headrest function adapts the bed so that your neck and head are always in the right position when sitting upright.

Stepless adjustment up/down for both head and foot end, individually or together.

Two beds can be connected and controlled in sync by one remote.

Download our app to easily find and save your favorite position. Supports voice control.

Adjust the bed position using voice control.

Active II also has:

A practical light under the bed that can be turned on without disturbing your partner.

Memory function for saving your favorite position.

Jensen Dream

This is the introductory model in our adjustable bed program. The Jensen Dream has all the functions you need to easily adjust your bed to your body's current needs as well as activities such as reading or even having breakfast in bed. It can either be placed on a bed base or have legs attached. The mattress on the base is a Jensen reversible mattress.

Jensen Dream is available together with the beds J2 and J3.

Jensen Aqive II

The technology inside this elegant bed is concealed by the fabric-covered frame, giving it the look of a continental divan set when inactive. The Jensen Aqive II is dual-sprung with spring systems in both the reversible mattress and the base. The extra spring system compared to the Jensen Dream, gives the bed even better stability and comfort.

Jensen Aqive II is available together with the beds J4, J5 and J6.

An adjustable bed can
give you the freedom
to do things other than
sleep, such as read a
book or watch TV.

Signature J8

The J8 represents the very best in design, materials and functionality. It is the bed for anyone who truly wants to invest in sleep comfort. The sheer height of this bed is a manifestation of its premium quality, giving room for more layers of springs. The experience of sleeping in the J8 is

further enhanced by the inclusion of Jensen Exact Comfort Adjustment as a standard feature, letting you fine tune an already stellar experience with the push of a button. In short, the J8 will let you sleep exactly as your body needs.

The J8 offers sleep comfort that must be experienced to fully understand. The exclusive and patented spring system Jensen Aloy® 3.0, together with an extra layer of pocket springs and Jensen® Original Zone System creates a completely unique level of comfort, designed for the human body. The inclusion of Jensen Exact Comfort Adjustment in the subframe gives you the possibility of

continuously adapting mattress firmness.

J8 is available in a wide range of colours and has large selection of specially designed accessories.

The fabrics are made from wool – an elegant and soft material that is inherently sustainable and naturally flame retardant.

We are constantly developing new technology to give you the best sleep quality possible. Through Jensen Exact Comfort Adjustment, we give you the opportunity to adjust the firmness of your mattress based on your needs as they are right now. In fact, there are many reasons why you may need to adjust your mattress. Going through life, our bodies change and we also experience periods of temporary pain due to everything from exercise to physical or monotonous work. With just the push of a button, you can adjust your mattress' tension to sleep better and wake up well rested.

Our continental beds and Nordic Seamless beds have whole sleeping surfaces, without hard edges in the middle. However, the technology still allows one to choose the degree of firmness individually.

Signature J6

The J6 is optimal sleep quality while giving room for plenty of flexibility. As one of our most exclusive beds, it is made to improve your quality of life both through its sleep comfort and design. The colour palette of the fabrics is inspired by the Nordic nature with deep shades of blue, green and

anthracite as well as lighter grey and beige. The flexibility is also evident when it comes to your options of tailoring the comfort of the J6. For example you can fit it with Jensen Exact Comfort as an add-on, or go all the way and make it an adjustable bed with the Jensen Active II.

The heart of the J6's sleep comfort is the exclusive and patented Jensen Aloy® 3.0 Spring System. Paired with the Jensen® Original Zone System integrated in the mattress, it provides a perfect balance between support and softness.

The materials used are carefully selected for their special properties. The J6 bed has upholstery in Innergetic® Latex and folding seams on the sides of the reversible mattress, double stitching in all corners and a discreet embroidered logo at the bottom of the frame. The bed is delivered in luxurious, Norwegian-produced wool from Innvik.

Available in all standard sizes but can also be ordered to measure.

Signature J5

The J5 is designed to provide great and affordable sleep comfort. You can order it as a reversible, Nordic, continental bed or as an adjustable combined with the luxurious Aqive II bed. The quality of the materials chosen for the J5 and the performance of the Aloy® 2.1 Spring

System all contribute to make this one of the Signature Collections most comfortable beds. It also gives you plenty of options when it comes to accessories. Order your J5 with the fabrics, legs, headboard and bedside tables of your choice to make your bedroom complete.

J5 has Jensen® Original Zone System with Jensen Aloy® 2.1 Pocket Spring System (14 cm). This provides an extra soft and long shoulder zone that gives great flexibility and space for your shoulders. Jensen Aloy® 2.1 also has built-in support for the lower back region.

J5 has an exquisite finish with double seams and a discreet, embroidered logo at the bottom, giving the look of an exclusive piece of furniture. For J5, we use sustainable Oeko-tex fabrics made from 61% recycled fabrics.

Available in all standard sizes but can also be ordered to measure.

Signature J4

The Jensen J4 is sleep comfort made affordable. The inclusion of the Aloy® 2.1 spring system sets it apart from the lower models in the J-series. Despite the slight decrease in spring height compared to the J5, (12,5 cm)

it still offers the great feeling of sinking into the mattress while receiving accurate support. High quality materials and fabric colours inspired by Norwegian nature makes the J4 the centerpiece of your bedroom.

J4 is equipped with the Aloy® 2.1 Spring System (12,5 cm) that supports and adapts to your body. The extra soft and long shoulder zone provides great flexibility and space for your shoulders. The spring system also features built-in support for the lower back. The bed can be ordered as a reversible, continental bed or as an adjustable combined with the luxurious Aqive II bed.

Mattress toppers.

The right mattress topper helps make a good night's sleep even better. It should feel soft and enveloping – but not clammy. All our bed mattresses are designed for this purpose.

An optimized zone with denser quilt at the shoulders and hips increases the elasticity of the fabric, which together with Jensen's patented zone system allows your shoulder and hip to sink into the mattress, providing sleep comfort that helps you wake up completely rested.

All Jensen mattress toppers carry the Swan label.

The mattress topper covers are separable, removable and washable.

Jensen Sleep I / II / III

Jensen Sleep I has Cellex XS filling while Jensen Sleep II delivers increased sleep comfort through Cellex XO. The luxury Jensen Sleep III has Innergetic® latex filling. Bacteria and dust mite dislike latex, resulting in a cleaner and healthier bed climate. Jensen Sleep mattresses have one smooth and one grooved side. Most people find the grooved side softer and the smooth side firmer. Jensen's inspiration from nature is shown in the design through a pattern of birch leaves. Height: 8 cm / 9 cm / 9 cm

Jensen TempSmart™

This mattress topper has a thermo-regulation system that actively balances the temperature changes that can disturb your sleep. This innovative technology consists of millions of microcapsules, adapting constantly to your skin's climate, by absorbing, storing and releasing excess heat as needed. In this way, the microcapsules keep you within your comfort zone, with great sleep quality as a result. Height: 9 cm

Jensen Optima

This voluminous mattress topper has a lovely, quilted design. The fabrics properties make it feel extra comfortable against the body, and provide a delicate and luxurious experience. The filling material is both perforated and profiled, resulting in a softer and a firmer side. The open cell structure of the Optima's Innergetic® Latex ensures optimal ventilation, enabling a clean and fresh bed climate. Height: 10 cm

Split topper

This mattress topper is developed especially for adjustable beds. It covers the entire surface avoiding the gap between sleeping partners. The top part of the topper is split, allowing you to raise or lower the head end of your bed without disturbing your partner. The foot end is just like a regular mattress topper. Split Topper is available for Sleep I/II/III, TempSmart™ and Optima. Height: 8-9 cm

Details are
important to us.
It's that little
extra that does so
much to create
the best overall
impression.

Customized by you.

Details are important to us. It's that little extra that does so much to create the best overall impression. That is why we have spent so much time developing our range of accessories, which has grown significantly over the recent years.

We can now offer a complete solution, with everything from various legs, headboards and bedside tables to ottomans. The accessories are available for all Jensen beds, and all fabric elements are of course matched to the colour and texture of the bed. Everything to create that unique ensemble.

The pillow completes the experience.

When it comes to sleep comfort, your pillow plays an important part. It should fit into the nape of your neck and fill the space between shoulders and head. It should neither be too high nor too low, but allow the neck to stay in line with your spine. A pillow suited to your body and preferred sleeping position will accentuate a good mattress and contribute to better sleep quality.

Jensen TempSmart™ Pillow

This pillow features a thermo regulation-function, adapting constantly to your skin's temperature, by absorbing, storing and releasing excess heat as needed. It keeps you within your comfort zone, with great sleep quality as a result.

Jensen PerfectPillow

The PerfectPillow is filled with thousands of fibre balls that mould to the shape of your head. The height of the pillow can be modified by removing filling until you find the perfect support for your head and shoulders.

Jensen SoftSheet.

Fits Jensen mattress toppers perfectly and is also available for split toppers. Made from 100% cotton satin in a very high quality that gives a soft and silky feeling against the skin. Washable at 60°C. Jensen SoftSheet carries the EU-flower and is Oeko-Tex approved.

Mattress topper protection.

With a high quality mattress topper in your bed, you will sleep better. To keep it nice and clean and to reduce wear, we advise that you use a mattress topper protector, that shields the bed from dirt, dust and moisture. All the while giving you first class sleep comfort.

Jensen SoftProtect mattress topper

The Jensen SoftProtect mattress topper protection is practical and very easy to put on and remove. The surface is wipeable and can also be machine washed if needed.

The material is thin and flexible with a surface that is treated to resist moisture while still letting air through and allowing the bed to ventilate. The quality is soft and comfortable, with stretch in the fabric, which means that the cover shapes itself to the mattress topper and provides both good sleep comfort and protection over the entire mattress surface.

Water repellent BAYGARD® WRS

Jensen SoftProtect contains BAYGARD® WRS, which is composed of special polymers that ensure a high and durable water repellent effect. BAYGARD® WRS do not contain any harmful substances such as heavy metals or formaldehyde.

Jensen TempSmart™ Protect

This technology both protects the mattress topper while increasing your sleep quality. This is achieved through the balancing the temperature to avoid the changes in climate that can cause restless sleep. TempSmart™ adapts to the skin's climate by absorbing, storing and releasing excess body heat as needed.

Headboards.

Complete your bed with a nice headboard. Our assortment is available in different designs, from classic to modern so you can find something that suits your interior design style.
